

Welcome to the Astronomie newsletter!

Welcome to our second newsletter!

Astronomie is a European funded project dedicated to increasing interest in astronomy amongst young students and primary education teachers. We strive to design and build a bridge between Astronomy education and game-based learning, using the acclaimed platform Minecraft Education.

1. Watch our Webinar!
2. Teacher Manual arriving soon!
3. Designing the Minecraft Worlds

Watch our webinar!

On September 21st, our team organised a webinar that presented the project to a worldwide audience. More than 90 viewers from 31 countries followed the live stream.

You can watch the recording on YouTube!

Teacher Manual arriving soon!

The first Astronomie project result is almost ready!

After months of intense preparation, the 104 page teacher manual is now being translated into four languages (Dutch, Greek, Portuguese, and Basque) and will become available by the end of October on our website. An Irish version will follow later.

The manual will bring exciting and challenging lesson plans, and exemplars to your classrooms and to whole-school communities. Stay tuned!

Designing the Minecraft Worlds

Work on designing the Minecraft Worlds is underway!

Three worlds have been conceived to support the Teacher's Manual. Your students will explore the heavens, planets, stars and galaxies in custom made Minecraft Education worlds.

While there's still a lot of work ahead of us, there's plenty of reason to be excited about the final result, due to be delivered in the first semester of 2024.
