NUCLIO

THE PROBLEM

There are very few countries in which astronomy is taught as a compulsory course, while in some countries, there is not an astronomy course in the curriculum at all.

AstronoMine aims to identify the gap in astronomy courses in EU countries and improve this situation by covering this gap through innovative training materials.

WELCOME TO THE

ASTRONO MINE

PROJECT!

OBJECTIVES

AstronoMine's objective is to increase interest in astronomy amongst young students and primary education teachers.

For that reason, the project has produced a variety of tools which aim to promote astronomy education and enhance skills relevant to STEM subjects

MAIN RESULTS

Teacher Manual

A comprehensive manual to help teachers introduce the topic of astronomy in their classrooms.

AstronoMine World in Minecraft

A dedicated Minecraft world that will introduce a variety of astronomy topics to students.
